

What is SAO Water?

Stabilized Aqueous Ozone (SAO water) is a highly effective all-in-one cleaner, sanitizer and deodorizer. Not only does it remove dirt, grime and stains, it kills up to 99.999% of viruses, bacteria and germs.

Totally natural, it leaves no toxic residue or fumes in its wake, making it 100% safe for use around humans, pets and even food. Better yet, it is no-rinse and cleans a wide variety of surfaces.

For a more powerful, convenient and safer alternative to traditional chemical cleaners, look no further than ***Tersano SAO water***.

Features of SAO Water:

- Quickly kills 99.999% of viruses (including Coronaviruses) and bacteria (including E. Coli, Salmonella, Listeria, MRSA)
- Easily removes dirt, grime, stains, odours, mould, mildew, etc
- Cleans for up to 6 days and sanitizes up to 24 hours
- Safe and effective with no toxins, carcinogens or chemical residue
- SDS rating of 0-0-0 means that it is as safe as water
- Safe for use around people, pets and food
- So safe that it will not harm our eyes or skin if accidentally splashed on
- Converts safely back to water and oxygen after cleaning
- Green and environmentally sustainable
- Eliminates need to purchase multiple chemical cleaners, sanitizers and deodorizers --- saving time and money

A Wide Range Of Applications

- Home Use

Tersano SAO is an ALL-IN-ONE solution

Kitchen Surfaces Stone, Marble, Ceramic Hardwood, Vinyl Walls and Windows Sinks and Faucets Table and Chairs Pets Furniture	Produce TV and Computer Screens Doors and Hand Rails Glass and Mirrors Toilets and Showers Cars and Motorcycles Plants Toys
--	--

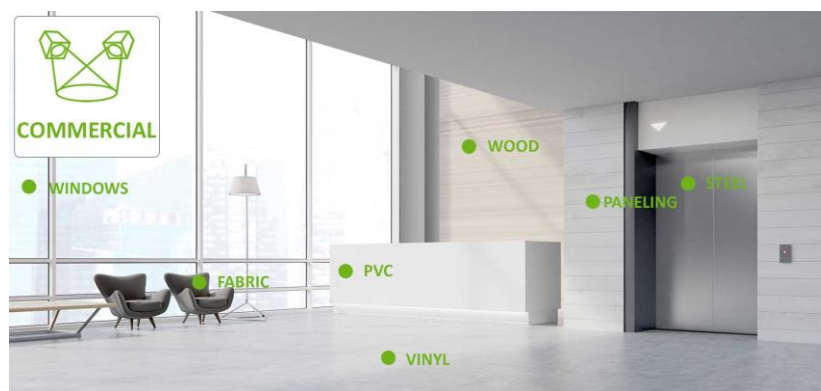

Truly the ONLY product in the world that starts with water and oxygen, then turns into a powerful all-in-one cleaner, deodorizer and sanitizer then reverts back to water and oxygen.

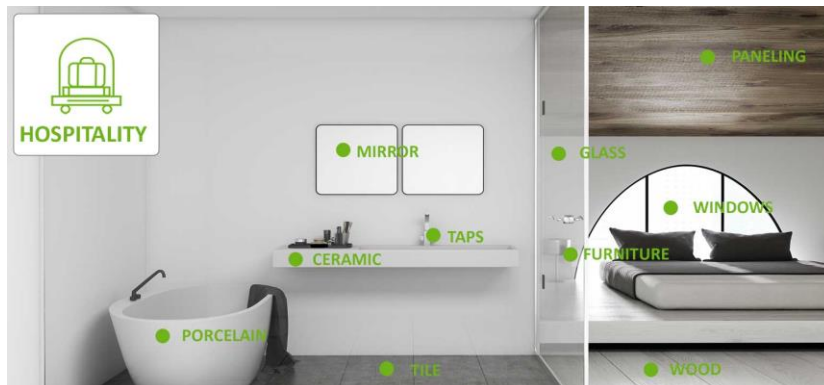

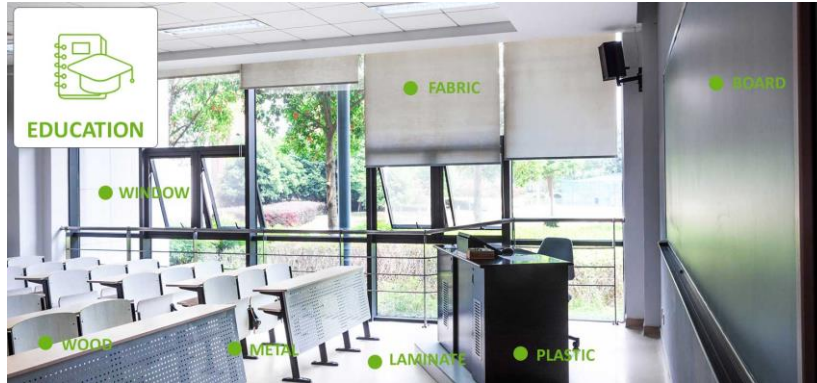

Replaces all these products

A Long Safety Record

- Aqueous ozone has been used as a powerful cleaner and sanitizer for over 100 years. It is very likely that the bottled water you drink and the fresh produce that you eat have been sanitized by aqueous ozone.
- By nature unstable, it is only with Tersano's proprietary SAO technology that aqueous ozone could be stabilized to last up to 24 hours to be used as an effective cleaner and sanitizer on all types of surfaces.
- Currently, it is used around the world as an everyday cleaner and disinfectant in schools, daycare centres, healthcare facilities, hotels, restaurants, airports, commercial, industrial and retail businesses.
- ***Tersano SAO water has been certified safe by top international regulatory bodies. From government agencies, independent test laboratories to sustainability organizations, it is widely recognized as a safe, sustainable alternative to traditional***

chemical cleaners and sanitizers, and carries an SDS 0-0-0 health and safety rating.

Benefits of SAO Water

- SAO is chemical-free, carcinogen-free and allergy-free. When used for general cleaning, it promotes a happier, healthier and safer work or home environment.
- As SAO water cleans and disinfects without residue or fumes, it is safer than traditional chemical cleaners that are toxic to humans, pets and plants.
- SAO water simplifies cleaning routines, saves storage space and reduces cleaning budgets. It cleans, sanitizes and deodorizes so many surfaces and things that it minimizes the need for separate stockpiles of cleaning products --- making it all the more cost-effective.
- SAO water scores a SDS 0-0-0-A health and safety rating, meaning it will not harm eyes or skin even if accidentally splashed on, i.e. no more red/irritated skin or protective gloves/goggles.

- SAO water reverts back to water and oxygen when cleaning is done, with zero impact to our planet and waterways. In keeping millions of litres of cleaning chemicals out of our lakes, rivers and drains, SAO water is sustainable cleaning at its best.
